Controversies in Bariatric Surgery, hosted by AAMC

Bariatric Surgery CME and ASMBS Maryland Chapter Meeting

4.0 CMEs/CEUs

This 4.0 credit CME program is designed for any health professional caring for the morbidly obese patient, including bariatric surgeons, physicians, nurses, nurse practitioners and dietitians.

The course was developed in collaboration with faculty from the Johns Hopkins Center for Bariatric Surgery to provide an annual in-depth exposure and review of controversial topics in bariatric surgery. This year's faculty and topics were chosen based on current trends in our specialty as we try to identify best practice methods for our patients. The bariatric surgeon will benefit greatly from this review and discussion from a panel of expert surgeons.

Learning Objectives:

- ▶ Understand different controversial techniques in performing a Sleeve Gastrectomy
- ▶ Discuss the role and effectiveness of robotic assisted Bariatric procedures
- ▶ Understand the indications for Bariatric Surgery in the adolescent population
- ▶ Discuss the management of GERD following Sleeve Gastrectomy
- ▶ Discuss the role of endoscopic techniques in the pre and post-operative phase

Speakers:

Alex Gandsas, MD, MBA, FACS
Director, AAMC Weight Loss and Metabolic Surgery Program; Program Director, Surgery Residency Program; Fellowship Director, Bariatric Surgery; President, MSMBS Maryland Chapter

Evan Nadler, MD
Co-Director, Children's National Obesity Inst., Children's National Med. Ctr.; Assoc. Professor of Surgery & Pediatrics, George Washington Univ. School of Medicine & Health Sciences
